

KAVYASHREE BK

Java Full Stack Developer

 +91 9113868727 |  kavyashree.bk1298@gmail.com |  Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Senior Software Engineer with 4 years of experience in designing, developing, and maintaining enterprise applications using Java, Spring Boot, Spring MVC, Microservices, REST APIs, React.js, JavaScript, HTML5, CSS3, SQL, MySQL, and MongoDB. Experienced in delivering scalable backend services, building responsive web applications, integrating RESTful APIs, and delivering secure, high-performance solutions across Healthcare, Telecommunications, and Digital Payment domains.

PROFESSIONAL EXPERIENCE

Infinite Computer Solutions Pvt. Ltd.

Senior Software Engineer | December 2025 – Present

Project: Anthem Care Management (ACMP)

Project Summary: Anthem Care Management (ACMP) is an enterprise healthcare application that streamlines the Prior Authorization and Utilization Management process by processing authorization requests, validating member and provider information, managing service line reviews, and supporting clinical decision-making.

- Developed and enhanced backend services using Java, Spring Boot and REST APIs to support Prior Authorization workflows.
- Worked on authorization request processing by validating member eligibility, provider information, and service line details.
- Designed and maintained RESTful APIs to enable secure integration between healthcare applications.
- Collaborated with business analysts, architects, QA teams, and client stakeholders to implement enhancements and resolve production issues.
- Participated in Agile activities including sprint planning, code reviews, testing, deployment support, and maintenance.
- Contributed to performance improvements and continuous enhancement activities by analyzing production issues and optimizing backend services.

Technologies: Java 17, Spring Boot, Spring MVC, Microservices, REST APIs, MongoDB, SQL, React.js, HTML5, CSS3, JavaScript, Git, Postman, Jira, Agile.

Genpact India Pvt. Ltd.

Software Engineer | March 2021 – August 2024

Project: PayPal EMEA WebOps

Project Summary: PayPal EMEA WebOps focuses on developing and maintaining country-specific PayPal marketing websites across the Europe, Middle East, and Africa regions.

- Developed responsive user interfaces using React.js, HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS, Redux, Context API
- Built reusable React components using Hooks, lifecycle methods, and Redux state management.
- Developed marketing pages for global clients including CitiBank, TikTok, Uber, and Spotify.
- Improved application performance through lazy loading, browser optimization, API integration, and form validation.
- Collaborated with business stakeholders and development teams to implement new features.
- Used Jira for sprint planning, bug tracking, testing, and production support.

Project: PayPal PP.com Global Navigation

Project Summary: Global initiative to standardize PayPal website navigation through legacy migration and content authoring.

- Performed content authoring for multiple country-specific PayPal websites.
- Migrated legacy MPP headers and footers using ECM and Elmo tools.
- Executed content updates, unit testing, and validation activities.
- Collaborated with development, QA, and content teams for enhancements and production support.
-

Project: AT&T

Project Summary: AT&T ADOPT is an enterprise telecom application that enables customers to manage network services and account information through a secure web platform.

- Application development and maintenance of Telecom enterprise application , Gathering and compiling user requirements, communicating with end-users, understanding user view and gaps that exist in the current implementation
- Brainstorming on various possible solutions and coming up with design to ensure that project deliverables are met according to specifications
- Responsible for Designing and developing software systems, using analysis and mathematical models to predict and measure outcome and consequences of design.
- Responsible for fixing bugs reported in the production environment. I have to work with the client to prioritize tickets(bugs) and work on the same
- Responsible for identifying the issues in early stages of coding and fixing it. Resolving post go-live issues, monitoring and reporting.
- To help validate, verify, communicate, and resolve application issues through careful testing in order to maximize the benefit of IT investments and initiatives.

Technologies: Java 17, Spring Boot, Microservices, REST APIs, React.js, HTML5, CSS3, Kafka.

Technical Skills

Programming Languages: Java

Frontend Technologies: HTML5, CSS3, React.js, Javascript

Backend Technologies: Spring Boot, Spring MVC, JPA, Microservices, REST APIs

Databases: MySQL, MongoDB

Messaging: Kafka

Development Tools: IntelliJ IDEA, Eclipse, Visual Studio Code, Git, Postman, Jira, ECM, Elmo

Methodologies: Agile, Scrum, SDLC

Education

Bachelor of Engineering (Information Science & Engineering)

Shree Siddhartha Institute of Technology

2016 – 2020
